SIMPLY MINING

ANOV OP 20

Operations Container

The ANOV Operations Container makes professional management of a site easier. With this extension option you increase secure operation of up to 20 mining containers.

\\ ADVANTAGES FOR YOUR MINING FARM

1. **The Operations Container connects the site with the internet.**
Network technology and site server are securely housed here. The redundant internet connection guarantees stable remote VPN access, secured by a double firewall.

2. **The Operations Container serves as a local data archive.**
All operating data for the mining rigs, containers and transformers is collected and stored here. It can be retrieved and analyzed anytime, if needed.

3. **With the Operations Container the site is monitored remotelyt.**
The video streams of all monitoring cameras are combined and stored here. You can retrieve the recordings remotely anytime.

4. **The Operations Container offers an uninterruptible power supply (UPS).**
An emergency power supply guarantees uninterrupted monitoring and control of the mining container even in case of a power outage.

5. **The Operations Container can be used as an office or room.**
On site, the employees can do their work in the Operations Container at two air-conditioned workstations. In addition, there is space for a lockable spare parts storage.

\\ FEATURES

_ Multi-level security access

_ Made in Germany

_ Turnkey delivery

_ Design customization for the customer, e.g. upgrade to showroom

_ Weatherproof, insulated shell

_ Weather station for monitoring outside conditions

_ heating and cooling for server and employees

_ Storage space

_ 19" rack with 42U for server technology

_ Fast assembly and commissioning

\\ SPECIFICATIONS

Power consumption	approx. 5 kW (max. 20 kW)
Weight	4 t
Size	20-foot container
Operating temperature	-40 °C bis 40 °C
Power connection	redundant
Capacity	management of 20 mining containers
Connectivity	Ethernet, fiber, UMTS, LTE and 5G

„The Operations Container enables professional site management thanks to remote monitoring, video archive, emergency power supply, and many other features."
